

June, 2022

Dear Parents of Students entering Fourth Grade in September of 2022,

Attached please find a summer reading and math packet for your child. Included is a list of suggested summer reading books as well as the two assignments your child is required to complete over the summer. Your child will need to read two books from the suggested reading list, or may select a grade appropriate book of choice.

The first reading assignment asks that students choose one book and write a summary of that book. The second assignment asks that students read a second book and write an opinion of that book. The attached forms will help guide students with this assignment.

Also attached is a summer math packet that your child is expected to complete over the summer. Although the packet title says, "third grade" this is the correct math packet for students entering fourth grade. It is also recommended that your child work on his/ her addition, subtraction, and multiplication math facts over the summer. Flash cards are a great way to help study these. Beginning in September, your child will have weekly multiplication quizzes, so it is important that these facts are memorized before the start of the year.

We hope you all have a wonderful summer! We look forward to meeting you and your child in September.

Sincerely,

Mrs. Menadue & Ms. Flaherty
